Electric Patient Lifter

Model **EK06201** · Joy Ours part no. **JOY-HST-6201**

A battery-powered mobile hoist with a wired handset, 150 kg safe working load and legs that open 62-87 cm.

KEY FEATURES

- **Electric lift** A wired handset with up and down buttons raises and lowers the user smoothly.
- **Battery powered** 24 V, 3 Ah battery, so no power lead is needed while in use.
- **Adjustable base** Legs open from 62 to 87 cm to suit the transfer.
- **360° rotating hook** Turn the user to face the right way during a transfer.
- **80-201 cm lifting range** Check it against the bed, chair and wheelchair heights you transfer between.
- **Rear castor brakes** Brakes on the 4-inch rear castors hold the lifter in place.

SPECIFICATIONS

SWL	150 kg

Lifter Weight	39 kg
Lifting Range	80-201 cm
Motor	DC permanent magnet motor
Controls	Wired handset with up and down buttons
Hook Rotation	360°

WHO IT SUITS

- People who need to be fully lifted between bed, chair and wheelchair
- Carers who should not be lifting a person by hand
- Assisted bathing, toileting and car transfers

GOOD TO KNOW

- The lifter weighs 39 kg and rolls on 3-inch (about 7.5 cm) front and 4-inch (about 10 cm) rear castors.
- Check the battery is charged before each transfer so a lift isn't interrupted.
- The handle sits at 93 cm; check it suits the carer who will push the lifter.
