WHO IT SUITS

- People who read, write or use a tablet in bed or in a recliner
- High beds or lift recliners that need a table reaching up to 125 cm
- Keeping a drink level beside an angled book or tablet
- Bedrooms and lounges where a furniture look matters

GOOD TO KNOW

- Keep drinks and plates on the small fixed section; the large section is the one that tilts.
- Measure the height of your bed (with mattress) or chair arms to check the table will clear them.
